

Priya Verma

Phone: +91 6261118533 | Email: pv7014944@gmail.com | GitHub: <https://github.com/priyaverma05>

Executive Summary

Motivated and detail-oriented graduate with strong communication and problem-solving skills. Experienced in handling technical systems and working in team environments, with the ability to quickly understand customer requirements and provide effective solutions. Eager to contribute in customer relationship management, client handling, and sales support roles.

Education

VIT Bhopal University

BTech ECE (AI and Cybernetics)

Cumulative GPA: **8.94/10**

Bhopal, Madhya Pradesh

June 2026

Technical Skills & Tools

Core Skills: Customer Communication, Client Handling & Relationship Management, Problem Solving & Query Resolution

Basic Sales & Persuasion Skills, Multitasking & Time Management.

Programming Languages: C/C++, Embedded C.

Tools: CRM

Projects

Sign Language to speech conversion System

Feb 2024 - May 2024

- Designed a real-time embedded system for converting hand gestures into speech output using microcontroller-based signal processing.
- Implemented sensor data acquisition, ADC sampling, and C/C++ processing for gesture detection and event handling.
- Technology: Arduino IDE, C++, Embedded systems.
- Role: Embedded System Developer
- Link: <https://github.com/priyaverma05/Sign-Language-to-speech-convergence.git>

Home Automation System

Jan 2025 – Apr 2025

- Designed a real-time automation system using ESP32 integrating Ultrasonic, LDR, and Temperature sensors.
- Implemented real-time sensor-based control logic achieving 80% environmental stability with remote appliance control.
- Technologies: ESP32, Ultrasonic, LDR, Temperature Sensor, Fan, C++.
- Role: System design & hardware interfacing.
- Link: <https://github.com/priyaverma05/Home-Automation.git>

The Rider's co-pilot: An intelligent assistant for smarter riding

Aug 2025 – Apr 2026

- Developed an embedded safety system integrating IR, MQ-3, RF module, and relay-based ignition control with real-time multi-sensor validation logic.
- Integrated IR, MQ-3, LoRa module, and relay ignition control with Arduino and Python-based EAR drowsiness detection.
- Role: System development and integration.
- Link: <https://github.com/priyaverma05/The-Rider-s-co-pilot-An-intelligent-assistant-for-smarter-riding.git>

Experience

Embedded System Design Internship-Maven Silicon

Jan 2025-Apr 2025

- Completed an Embedded Systems Design Internship at Maven Silicon, working on microcontroller architecture, peripheral interfacing, and real-time firmware development in Embedded C. Designed and implemented a sensor-based home automation system with ADC interfacing and control logic for real-time embedded applications.
- Link: <https://drive.google.com/file/d/1xB6gNdnCX6ZPCLdEzL2APt73IzATJrYd/view?usp=sharing>

Certifications & Training

- Embedded System Design Certification (Maven Silicon, 2025)

Achievements

- Awarded the STARS Scholarship by VIT Bhopal University (2022).
- Received ₹25,000 grant under Laptop Yojna (Madhya Pradesh Government) for academic excellence (2022).
- Awarded the INSPIRE Scholarship by the Government of India, offering ₹4,00,000 support for higher education in science and technology (2022).
- Secured top rank in district in Class 10th and 12th board examinations.

Extracurricular Activities

- Volunteered for attending the ANRF-sponsored National Symposium on Innovations in Intelligent Systems at (Feb 2024).
- Worked as a team member in the ROBOX event at AdvITYa 2024.
